

GOICC Chrome Gel Nail Polish – User Manual

🔮 Product Overview

GOICC Chrome Gel Nail Polish is a metallic mirror-finish gel polish designed to give your nails a high-shine chrome effect. Best used for professional-looking nail art at home or in salons.

- Type: UV/LED Gel
 - Finish: Mirror / Metallic / Chrome
 - Curing: UV or LED lamp required
-

🔮 How to Achieve the Best Mirror Effect

The mirror effect depends heavily on correct application. Please follow the steps carefully for best results.

☑ Step-by-Step Guide:

1. Prepare Nails

- File and shape your nails.
- Push back cuticles and clean nail surface.
- Use a nail buffer to gently remove shine.

2. Apply Base Coat

- Apply a thin layer of gel base coat.
- Cure under UV lamp (2 mins) or LED lamp (60 sec).

3. Apply GOICC Chrome Gel (Very Thin Layer)

- Shake well before use.
- Apply a very thin, even layer of the chrome polish.
- Wait 10 – 15 seconds before curing to allow the pigment to settle.
- Cure under UV (2 mins) or LED (60 sec).

4. Optional – Apply Second Thin Layer

5. Do NOT Apply Top Coat

- To maintain the mirror shine, do NOT apply any top coat.
 - If top coat is used, the mirror effect may turn glossy or dull.
-

🔮 Tips for Best Results

- Always apply very thin layers – thick coats may wrinkle or dull.
 - Shake bottle well before use to evenly disperse metallic pigments.
 - The chrome effect is most visible on smooth, buffed nail surfaces.
 - Try using a black or dark base colour underneath to enhance contrast.
 - Allow the polish to **self-level for 10 seconds** before curing for a smooth finish.
-

🔮 Warnings

- For external use only.
 - Avoid skin contact. Discontinue use if irritation occurs.
 - Keep out of reach of children.
 - Store in a cool, dry place away from direct sunlight.
